RE: Sign on changes coming to Practice Connect® effective 1/14/2021

Date:

Multi-factor Authentication Coming Soon to Practice Connect®

In the coming months, we'll be transitioning the way you log into Practice Connect® by using a new, more secure way to verify your identity. This new way of signing into Practice Connect® is called **Multi-factor Authentication (MFA)**.

What is Multi-factor Authentication?

Passwords are becoming increasingly easy to compromise. They can be stolen, guessed, and hacked. We must take additional security measures to protect our valuable patient information. MFA is a security enhancement that requires the use of a unique email address to grant account access. This additional method of identity verification protects both your account as well as the data accessed through Practice Connect® from unauthorized use and fraud.

What is One Healthcare ID and its registration requirements?

One Healthcare ID is the mechanism Monarch will use to deliver a secure, centralized account management solution that enables you to reset your password, recover your account, and maintain your profile, eliminating the need for you to contact Monarch for these new, self-service features.

Please note – One Healthcare ID requires a UNIQUE EMAIL ADDRESS to complete the registration. We strongly recommend for all offices to start thinking about what email addresses will be used to verify a Practice Connect® user's identity. Each Practice Connect® user should have their own, unique email address. If you do not currently have a company email address, please contact your office manager/administrator to inquire about the best way for you to obtain a unique email address for One Healthcare ID verification.

How will this affect me?

Monarch will be implementing Multi-Factor Authentication to the provider network on a ROLLING BASIS. **You do not need to set up an One Healthcare ID until you receive notification and additional instructions.** However, on or after 1/14/2021, you will notice a change to the Practice Connect® Login in screen. You will be able to continue to access Practice Connect® with your current User Name and Password (or set up your One Healthcare ID in advanced of your scheduled timeframe) through the following steps:

- Currently, when you sign on to Practice Connect®, the User Name and Password are on the same screen. (See below)

Monarch HealthCare®

Note: “Migrate to One Healthcare ID Now” is provided as an option if you would like to migrate your account in advance of your scheduled timeframe. Click on the instructions for a walkthrough on obtaining your One Healthcare ID or click on “Migrate to One Healthcare ID Now” and follow the step-by-step instructions to set up your new One Healthcare ID.

Next Steps

This new change is the first part of Monarch’s effort to provide a more secure platform for the user and the system. In the coming months, you will be receiving instructions on when your Practice Connect® account will be migrated. If you have any questions, please reference the FAQ section in Practice Connect® Information Library.
